SUMMARY

Full Stack Developer with hands-on experience building operational web applications in the Israel Defense Forces. Experienced in developing end-to-end solutions using React, TypeScript, Node.js, Express and MongoDB, including data management systems, dashboards and information visualization interfaces.

Skilled in improving application performance, designing efficient data flows, building REST APIs and working with multiple storage solutions including MongoDB, SQL and S3. Strong problem-solving skills with experience maintaining and enhancing production systems.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Redux Toolkit, Vite, Material UI, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Socket.IO

Databases & Storage: MongoDB, Mongoose, SQL, Oracle, AWS S3

Data & Visualization: Mapbox GL, Leaflet, OpenLayers, Chart.js

Tools & Infrastructure: Git, GitLab, Docker, Kubernetes, OpenShift, Linux, Postman

EXPERIENCE

Full Stack Developer — Israel Defense Forces

2024 – Present

- Developed and maintained operational web systems using React, TypeScript, Node.js, Express and MongoDB.
- Built information management and tagging workflows, including interactive interfaces for organizing and visualizing complex data.
- Improved application performance by optimizing data loading strategies, reducing unnecessary API requests and implementing on-demand data fetching.
- Designed and optimized data models using MongoDB and SQL based on system requirements and query performance.
- Implemented storage solutions using S3 for large files, historical data and backup management.
- Developed activity history and audit tracking features to improve system visibility and operational monitoring.
- Created backend services and REST APIs, and resolved production issues across frontend, backend and data layers.
- Worked with Docker, OpenShift and Git workflows in a production environment.

PROJECTS

Operational Information Management Platform

- Developed a full-stack platform for managing, tagging and visualizing operational information.
- Built map-based interfaces and data visualization components using React and mapping technologies.
- Implemented backend services and database integrations for efficient information retrieval.

Global Terrorism Analytics Platform

- Built a data analytics platform with interactive dashboards and visualizations.
- Implemented MongoDB aggregation pipelines for processing and analyzing large datasets.

AttendancePro

- Developed employee and manager dashboards with role-based access control.

EDUCATION

The College of Management
Practical Software Engineering (Handesai)
